Setup

- Delete Accounts through Proxy Gateway using Apex DataLoader by providing Server URL in as shown below.
    o   Server host : https://login-salesforce-com.ciphercloud.net
- Login with following credentials :
    o   Username : demo4.ciphercloud@gmail.com
    o   Password : ciphercloud@123Tz36FXdNAvTL9nI9Vml1DwVV

Steps

- Go to Windows and start Apex Data Loader.
- Click on settings to configure Sales Force to go through CipherCloud Gateway by providing Server URL in as shown below.
    o   Server host: https://login-salesforce-com.ciphercloud.net
- Login with following credentials **:**
    o   Username : demo4.ciphercloud@gmail.com
    o   Password : ciphercloud@123Tz36FXdNAvTL9nI9Vml1DwVV

- Click on Export and on Accounts.
- Save the extract file in .csv format and proceed for Next.
- Select only id field and Finish.
- Click Delete and Accounts.
- Browse the extracted file and proceed for Next and Click on ok.

Expected Result

- Exporting Records through Proxy Gateway should not display the deleted Records.
